President's Message

The Athens Institute for Education and Research (ATINER) is pleased to announce the publication of a number of peer reviewed, open access journals of original research work. Most of the articles will be selected from the numerous papers that have been presented at the various annual international academic conferences organized by the different research divisions and units of the Athens Institute for Education and Research. The plethora of papers presented every year will enable the editorial board of each journal to select the best, and in so doing produce a top quality academic journal. In addition to papers presented, ATINER will encourage the independent submission of papers to be evaluated for publication.

The current issue is the first of the *Athens Journal of Education* published by the [Education Research Unit](#) of the Athens Institute for Education and Research (ATINER).

The Head of the [Education Research Unit](#) is member of the Editorial Advisory Board. The Academic Members of the research unit are members of the Editorial Board and will assist the editor and the Editorial Advisory Board with the peer reviewing of all submitted papers. Currently, the academic members of the five research units consist of over 100 international experts from about 50 countries.

Gregory T. Papanikos

President

Athens Institute for Education and Research

Editor's Note

The Athens Journal of Education (AJE) is a quarterly international academic journal published by the Athens Institute for Education and Research (ATINER). The articles are double-peer reviewed by international scholars with strong academic research backgrounds in their area of expertise.

The Athens Journal of Education is the official journal of the Education Research Unit of ATINER. The majority of published articles are selected from the numerous papers that have been presented at various annual international conferences organized by ATINER. However, independent submissions are equally welcomed. All papers submitted should be original and innovative. To ensure a high- quality standard of publication, the best papers are selected by the Editorial Board of the Athens Journal of Education.

The Athens Journal of Education aims to promote interdisciplinary studies on issues of theoretical and practical importance, concerning all aspects relating to the broad field of education with local, national, regional and global implications, thus contributing to international literature on these disciplines.

Articles for publication consideration in the AJE journal should relate to original studies in various fields of education including, inter alia, philosophy of education, online and distance education, mathematics and statistics education, higher education etc.
